# Part I. PubMed 醫學期刊文獻資料庫

## 1. 關於 PubMed

### 1.1 簡介

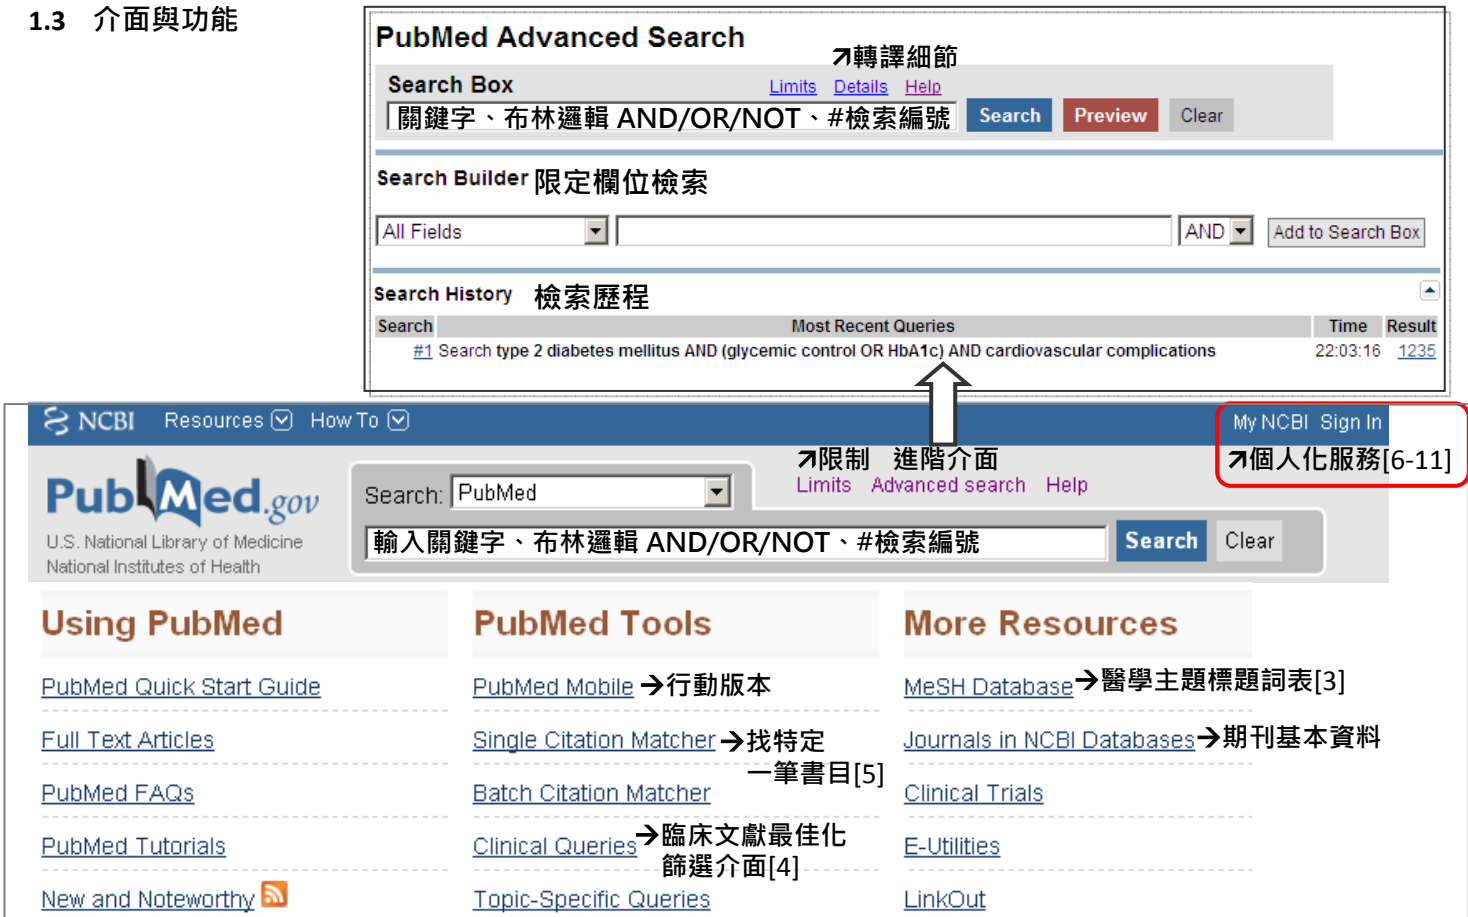

- (1) 隸屬：美國國家衛生研究院(NIH) > 國家醫學圖書館(NLM) > 生技資訊中心(NCBI) > Entrez 資訊檢索系統 > PubMed 醫學期刊文獻索引摘要(非全文)資料庫。
- (2) 收錄：涵蓋臨床與基礎醫學、護理、牙科學、獸醫、健康照護等主題。年代起自 1946 年，逾 2 千萬筆書目。現刊含 5,500 種，主要語言為英語，及其他 38 種語言。任何人皆可免費查詢書目，並提供 LinkOut 對外連結到各出版社之電子全文（可否下載取決於所在機構訂購或免費）。
- (3) 組成資料庫：

① MEDLINE	經 <u>Medical Subject Headings</u> 索引程序之資料庫，為 PubMed 主要組成部分
② In Process	正在進行加工索引之書目
③ Publisher-Supplied	通常是出版社提供電子先於紙本發行之未正式出版文獻的書目，大部份會進入 In Process，接著變成 MEDLINE 的一部份
④ PubMed Not Medline	僅佔少部份，為非 MEDLINE 收錄準則的文獻書目
⑤ NCBI Online books	NCBI 收錄之 850+本電子書及其章節索引

### 1.2 網址

- (1) 馬偕醫院圖書館首頁 > 常用連結 > PubMed Medline 或  
<http://www.ncbi.nlm.nih.gov/sites/entrez?holding=itwmmhlib&tool=itwmmhlib&myncbishare=itwmmhlib>  
建議使用本連結，因為當一筆書目呈現時，若本館有訂購電子全文期刊可立即依此右側圖示辨識其為馬偕電子館藏，在馬偕網域內即可下載全文→ 
- (2) 一般首頁 <http://www.ncbi.nlm.nih.gov/pubmed/>

### 1.3 介面與功能

The screenshot shows the PubMed website interface. At the top right, there is a red box containing the text "My NCBI Sign In" and "個人化服務[6-11]". Below this, there is a search bar with the text "PubMed" and a dropdown menu. To the right of the search bar, there are links for "Limits", "Advanced search", and "Help". Below the search bar, there are three columns of links: "Using PubMed", "PubMed Tools", and "More Resources". The "Using PubMed" column includes links for "PubMed Quick Start Guide", "Full Text Articles", "PubMed FAQs", "PubMed Tutorials", and "New and Noteworthy". The "PubMed Tools" column includes links for "PubMed Mobile", "Single Citation Matcher", "Batch Citation Matcher", "Clinical Queries", and "Topic-Specific Queries". The "More Resources" column includes links for "MeSH Database", "Journals in NCBI Databases", "Clinical Trials", "E-Utilities", and "LinkOut".

## 2. 找特定主題的文獻

### 2.1 形成關鍵字: 同義字與 MeSH Terms

範例：In a 56-year-old woman with type 2 diabetes mellitus, microproteinuria, elevated blood pressure, and dyslipidemia, does “tight” control of glucose reduce cardiovascular complications?

中文關鍵字	英文關鍵字與同義字	MeSH terms (控制詞彙)
第二型糖尿病	<u>type 2 diabetes mellitus</u>	<u>Diabetes Mellitus, Type 2</u>
血糖控制	glycemic control OR <u>HbA1c</u>	<u>Blood Glucose OR Hemoglobin A, Glycosylated</u>
心血管併發症	cardiovascular complications	<u>Cardiovascular Diseases/etiology</u>
嚴格	tight OR strict	(無適當 MeSH · 故應盡可能列出同義字 · 可用*表字尾變化 · 例: tight* OR strict*)
56 歲女性	(不需直接輸入關鍵字 => 凡性別、年齡等條件 · 可使用 Limits 功能做篩選)	

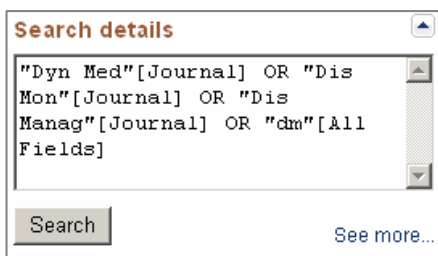

(表格內畫底線關鍵字表示為 MeSH 或可被轉譯成適當 MeSH)

練習題：

中文關鍵字	英文關鍵字與同義字	MeSH terms (控制詞彙)

### 2.2 適當使用 MeSH Terms

- 盡可能輸入全名。例: DM vs. diabetes mellitus
- 搜尋後檢查 Details · 查看系統是否轉譯正確 · 必要再適當修正
  - 輸入關鍵字 DM (或 diabetes mellitus)查詢
  - 移到檢索結果右側 Search details (需細節點 See more...)

- 下圖為失敗(DM) vs. 成功(diabetes mellitus)轉譯範例

<table border="1"> <tr> <td>DM</td> <td>01:58:59</td> <td><a href="#">22278</a></td> </tr> <tr> <td>diabetes mellitus</td> <td>01:56:46</td> <td><a href="#">292314</a></td> </tr> </table>	DM	01:58:59	<a href="#">22278</a>	diabetes mellitus	01:56:46	<a href="#">292314</a>	 	<div style="border: 1px solid gray; padding: 5px; background-color: #e0e0e0;"> <p><b>Translations:</b></p> <p>DM "Dyn Med"[Journal] OR "Dis Mon"[Journal] OR "Dis Manag"[Journal] OR "dm"[All Fields]</p> </div> <div style="border: 1px solid gray; padding: 5px; background-color: #e0e0e0; margin-top: 10px;"> <p><b>Translations:</b></p> <p>diabetes mellitus "diabetes mellitus"[MeSH Terms] OR ("diabetes"[All Fields] AND "mellitus"[All Fields]) OR "diabetes mellitus"[All Fields]</p> </div>
DM	01:58:59	<a href="#">22278</a>						
diabetes mellitus	01:56:46	<a href="#">292314</a>						

練習題

- ex. MRA
- ex. magnetic resonance angiography
- ex. MRI
- ex. breast milk

#### PubMed 怎麼啟動自動比對功能?

- 使用者輸入關鍵字 · PubMed 將關鍵字(片語)依次比對 Medical Subject Headings⇒期刊名稱表⇒作者與研究者清單⇒將關鍵字拆成單字 · 再比對 Medical Subject Headings⇒期刊名稱表⇒作者與研究者清單。過程中 · 一旦比對到即停止比對。(但關鍵字加了“雙引號”、\*星字符號、[限定欄位]就不會被啟動自動比對)
- 若比對到 MeSH: PubMed 將檢索該 MeSH(並包含其狹義詞與副標題)與 All Fields (例: diabetes mellitus)
- 若依次都未比對到 MeSH、期刊名稱表、作者與研究者清單: PubMed 將關鍵字檢索 All Fields

(3) 參考一篇符合所需文獻的 MeSH Term，將之作為關鍵字

例: glycemic control 由 Details 已知為非(可轉譯的) MeSH term

- 1 輸入 glycemic control[ti] (⇒ti 指檢索篇名欄位以提供相關度)
- 2 將 Display Setting 切換為 Format: Abstract [參考: 2.7]
- 3 參考數篇與此關鍵字相關之書目，得知應使用 MeSH Terms

為 Blood Glucose OR Hemoglobin A, Glycosylated

(注意: 書目須標示[PubMed - indexed for MEDLINE]方有，檢索結果前幾頁為新加入書目，通常不會有)

Am Heart J. 2010 Jun;159(6):e35.  
**Glycemic control and clopidogrel response.**  
Gaborit B, Cuisset T, Frère C, Alessi MC, Dutour A.  
PMID: 20569701 [PubMed - indexed for MEDLINE]

Publication Types, MeSH Terms, Substances

**MeSH Terms**

- Blood Glucose/drug effects\*
- Blood Glucose/metabolism
- Cardiovascular Diseases/blood
- Cardiovascular Diseases/complications
- Cardiovascular Diseases/drug therapy\*
- Diabetes Mellitus/blood\*
- Glycemic Index/drug effects
- Hemoglobin A, Glycosylated/metabolism

(4) 必要時使用 MeSH Database，以確認用語或精確查詢 [參考: 3]

ex. clowning (小丑療法增加試管嬰兒成功率)

=> MeSH: \_\_\_\_\_

ex. tears (女性眼淚藏密男人缺性致) => \_\_\_\_\_

### 2.3 執行檢索 (AND、OR、NOT 需使用大寫)

(1) 一次輸入: 於空白欄位內輸入所有主要關鍵字，執行 Search

**Tip:** 當您對關鍵字很熟悉，或求快速時，可一次輸入所有關鍵字

PubMed.gov  
U.S. National Library of Medicine  
National Institutes of Health

Search: PubMed [dropdown] Advanced search Help

type 2 diabetes mellitus AND (glycemic control OR HbA1c) AND cardiovascular complications

Search Clear

(2) 逐次輸入: 於空白欄位分次輸入關鍵字，執行 Search

**Tip:** 當您對關鍵字沒有把握時，或想要謹慎地彈性組合各組關鍵字時，可逐次輸入各組關鍵字，再於 Search History 進行組合

type 2 diabetes mellitus Search Clear

glycemic control OR HbA1c OR blood glucose Search Clear

cardiovascular diseases Search Clear

## 2.4 檢索歷程: Search History

(1) 切換到 [Advanced Search](#)，在檢索欄位下方即呈現 [Search History](#)

**Tip:** 可查看目前為止的檢索歷程，紀錄保留 8hrs；並可於此進行做組合檢索

(2) 要將第 2 筆 ~ 第 4 筆檢索結果結合，取符合三項條件之書目，故輸入 #2 AND #3 AND #4

(3) 執行 Preview，檢索結果將呈現在 History (若執行 Search 則直接呈現所得書目)

(4) 可加入更多關鍵字，以縮小檢索結果

(5) 點選 Result 筆數，可看檢索結果

## Advanced Search

The screenshot shows the "Search History" page. It includes a list of queries with columns for "Search", "Most Recent Queries", "Time", and "Result". The "Result" column values are circled in red. A tooltip menu is open over the "#4" link, showing options like "AND", "OR", "NOT", "Delete", "Go", "Details", and "Save in My NCBI".

Search	Most Recent Queries	Time	Result
#6	Search (tight OR strict) AND #5	02:08:07	188
#5	Search #2 AND #3 AND #4	02:07:56	5382
#4	Search cardiovascular diseases	02:07:39	1560011
#3	Search glyemic control OR HbA1c OR blood glucose	02:07:27	180178
#2	Search type 2 diabetes mellitus	02:06:55	59489
#1	Search type 2 diabetes mellitus AND (glyemic control OR HbA1c) AND cardiovascular complications	02:06:45	1023

Options menu:

- AND
- OR
- NOT
- Delete
- Go
- Details
- Save in My NCBI

Buttons: Less History, Clear History

## 2.5 限制條件: Limits

**Tip:** Limits(除 Dates、Language)將排除“in process”、“supplied by publisher”、“PubMed not Medline”的文章，而這些通常都是最新的。可用下列語法彌補此問題:

(in process[sb] OR publisher[sb] OR pubmednotmedline[sb]) AND 關鍵字

### Limits

**Dates**

Published in the Last:  **出版時間**

---

**Type of Article 文獻類型**

- Clinical Trial
- Editorial
- Letter
- Meta-Analysis

1. **Glycemic control and cardiovascular events in dialysis patients**

Drechsler C, Krane V, Ritz E, März W, Wanner C.

Department of Medicine, Division of Nephrology, University Hospital, Oberdürenbergstr. 15, D-72076 Esslingen, Germany. c.drechsler@gmx.net

**BACKGROUND:** Patients on maintenance dialysis treatment experience a high rate of cardiovascular death. Poor glycemic control is associated with cardiovascular morbidity and mortality. We investigated the impact of glycemic control on cardiac and vascular events in dialysis patients.

**AND RESULTS:** Glycohemoglobin A1c (HbA(1c)) was measured in 1000 patients who participated in the German Diabetes and Dialysis Study (4D Study). In multivariate Cox regression analyses, we determined hazard ratios to reach pre-specified levels at baseline: sudden cardiac death (n=160), myocardial infarction (n=469), death caused by heart failure (n=41), and all-cause mortality (n=1000). Patients with an HbA(1c) > 8% compared with those with an HbA(1c) <= 6% (hazard ratio, 2.14; 95% CI, 1.4-3.2) in multivariate models. With each 1% increase in HbA(1c), the risk of sudden cardiac death, myocardial infarction, and mortality increased by 8%. There was a trend toward higher mortality from heart failure, whereas myocardial infarction and mortality were explained mainly by the impact of HbA(1c) on sudden cardiac death. Glycemic control is strongly associated with sudden cardiac death in diabetic hemodialysis patients. Tight glycemic control decrease sudden death requires further evaluation. <http://www.clinicalstudyresults.org>. Unique identifier: CT-981-423-23

PMID: 19948978 [PubMed - indexed for MEDLINE]

## 3. 透過 MeSH Database 查詢 PubMed

Medical Subject Headings(MeSH): 醫學主題標題表。美國國家醫學圖書館(NLM)編製,可用以分析生物醫學之期刊文獻的主題內容之控制語彙表。為多個醫學資料庫採用,如 Medline、Cochrane Library。讓使用者檢索文獻的結果更精確、更完整。PubMed 在給定每篇文章 MeSH Terms 時,除給定主題意識的詞彙,也標示人類/動物性別、年齡層、研究設計與工具等、文獻類型等。

- 主標題 (Main Headings): 描述主題或內容特性的語彙,為一樹狀階層性結構 (MeSH Trees)
- 副標題 (Subheadings): 獨立於樹狀結構外,可輔助限定「文獻中討論該 main heading 的某一方面問題」,如治療、診斷、血液、藥物、病毒、死亡率、流行病學...等

MeSH  
NLM Controlled Vocabulary

Search: MeSH ① 下拉選擇 MeSH Save search Limits Advanced search Help

#### 4. 臨床文獻最佳化篩選介面: Clinical Queries

- ◎ 時機: 可在已經於一般檢索介面做了一些檢索後, 再使用 Clinical Queries 做為篩選出更精少文獻的輔助; 也可以一開始檢索就使用 Clinical Queries
- ◎ 功能: 滿足實證導向文獻搜尋, 提供臨床問題之快速查詢, 免除使用者自行輸入繁複的檢索策略。共提供三種篩選機制: Clinical Study Categories 臨床研究最佳化篩選、Systematic Reviews 系統性回顧文獻篩選、Medical Genetics 遺傳學文獻篩選

### PubMed Clinical Queries

**Search** ① 輸入關鍵字、布林邏輯 AND/OR/NOT、#檢索編號 **Search**

臨床研究最佳化篩選 | 系統性回顧文獻篩選 | 遺傳學文獻篩選

**Clinical Study Categories** | **Systematic Reviews** | **Medical Genet**

**Category:** Therapy | Etiology | Diagnosis | **② 臨床面向** | Therapy | Prognosis | Clinical prediction guides

**Scope:** Broad | Broad | **③ 文獻量** | Narrow

**Topic:** All | All | Diagnosis | Differential Diagnosis | Clinical Description | Management | Genetic Counseling | Molecular Genetics | Genetic Testing

**Results: 5 of 6**  
The value of a liquid alginate suspension (Gaviscon Advance) in the management of laryngopharyngeal reflux. [Eur Arch Otorhinolaryngol. 2009]  
Treatment of chronic posterior laryngitis with esomeprazole. [Laryngoscope. 2006]  
Effect of pantoprazole on the course of reflux-associated laryngitis: a placebo-controlled double-blind crossover study. [See all (6)]

**Results: 5 of 169**  
[Diagnosis of gastroesophageal reflux disease: a systematic review] [Korean J Gastroenterol. 2010]  
Systematic review: persistent reflux symptoms on proton pump inhibitor therapy in primary care and community studies. [Aliment Pharmacol Ther. 2010]  
Type A esophageal atresia: a critical review of management strategies at a single center. [J Pediatr Surg. 2010] **See all (169)**

**④ 需執行See all · 才會加入Search History**

Filter citations to a specific clinical study category and scope. These search filters were developed by [Haynes RB et al.](#) (篩選機制說明)

Filter citations for systematic reviews, meta-analyses, reviews of clinical trials, evidence-based medicine, consensus development conferences, and guidelines. See [related sources](#). (篩選機制說明)

## 5. 找特定一筆書目: Single Citation Matcher

時機之一：手上有一筆書目，但不確定有沒有錯誤，或想在 PubMed 上找到完整書目和全文連結

### ❶ 手上有下列書目

1. Izquierdo RE, Knudson PE, Meyer S, Kearns J, Ploutz-Snyder R, Weinstock RS. A comparison of diabetes education administered through telemedicine versus in person. *Diabetes Care* 2003; 26:1002-1007. [示範題]
2. Abstracts of the American Society of Hypertension, Inc. Twenty-Sixth Annual Scientific Meeting and Exposition. May 21-14, 2011. New York City, New York, USA. *J Clin Hypertens (Greenwich)* 2011; 13 Suppl 1:A1-181. [練習題]
3. Peterson PN, Shetterly SM, Clarke CL, et al. Health literacy and outcomes among patients with heart failure. *JAMA* 2011; 305:1695-1701. [練習題]

### ❷ 到 PubMed 首頁，點選 Single Citation Matcher

### PubMed Single Citation Matcher

- o Use this tool to find PubMed citations. You may omit any field.
- o Journal may be the full title or the title abbreviation.
- o For first and last author searching, use smith jc format.

Journal:

Date:  (month and day are optional)

Volume:  Issue:  First page:

Author name (see [help](#))

Only as first author  Only as last author

Title words:

❸ 左側欄位內容不須填滿，只要填有把握或重點欄位；通常填寫 Journal(期刊名)、Volume(卷)、First Page(第 1 頁)即可

### ❹ Go

### ❺ 賓果！找到符號條件一筆

[Display Settings:](#)  Abstract [Send to:](#)

[Full Text](#) **FREE** [Mackay Memorial Hospital Library E Fulltext](#)

[Manage Filters »](#)

## 8. 儲存檢索策略: Save Search

(1) 在 PubMed 執行任何檢索後，有兩個方式可以進行檢索策略儲存

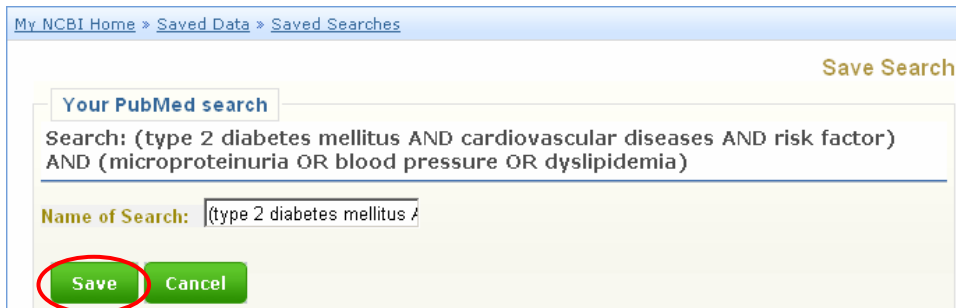

- ◎ 點選檢索欄位右上 Save Search

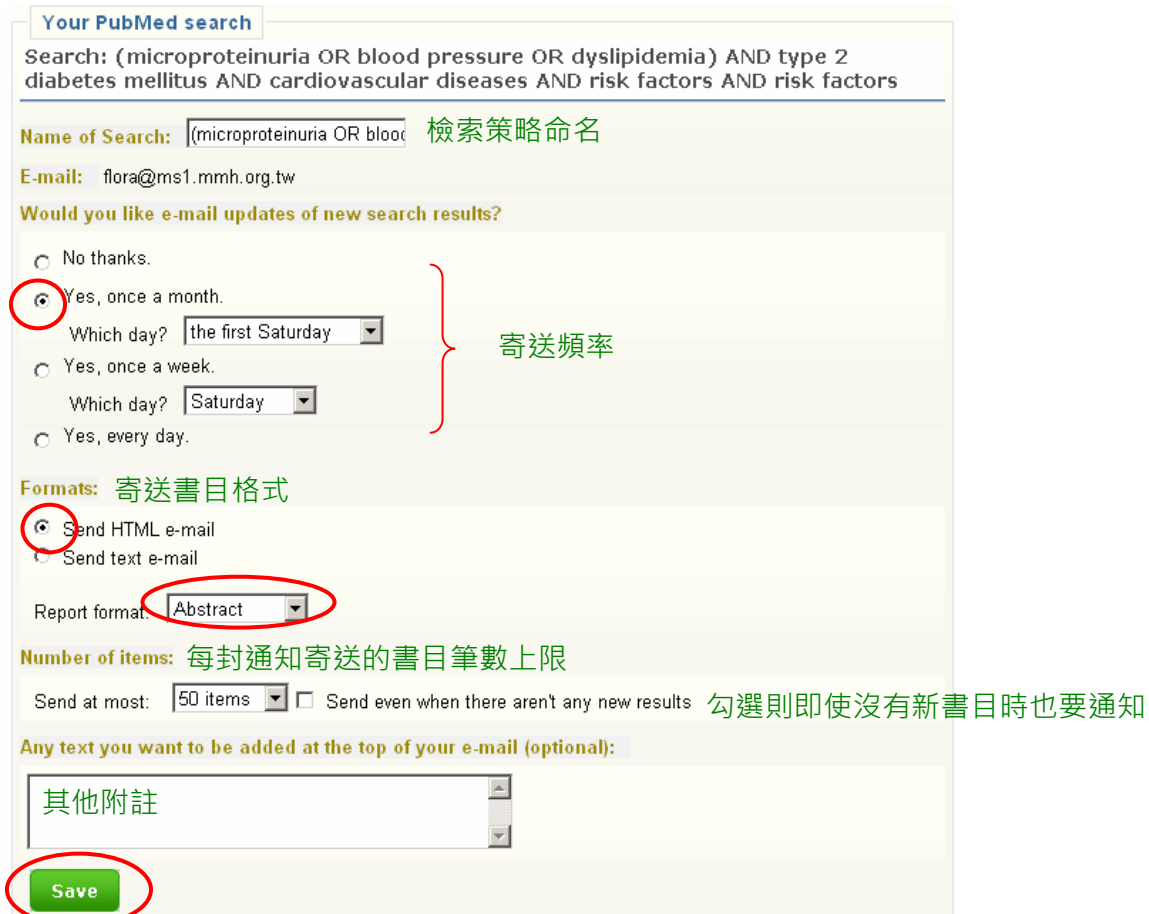

- ◎ 點選 Advanced Search，移到 Search History，點選#數字超連結，彈出 Options 點 Save in My NCBI

(2) 跳出設定視窗，按 Save 儲存檢索

## 9. 新知通告服務: 定期 e-mail 最新書目 (承 8，繼續完成以下設定則將主動寄送)

Your PubMed search

Search: (microproteinuria OR blood pressure OR dyslipidemia) AND type 2 diabetes mellitus AND cardiovascular diseases AND risk factors AND risk factors

Name of Search: (microproteinuria OR blood pressure OR dyslipidemia) AND type 2 diabetes mellitus AND cardiovascular diseases AND risk factors AND risk factors 檢索策略命名

E-mail: flora@ms1.mmh.org.tw

Would you like e-mail updates of new search results?

No thanks.

Yes, once a month. } 寄送頻率

Which day? the first Saturday

Yes, once a week.

Which day? Saturday

Yes, every day.

Formats: 寄送書目格式

Send HTML e-mail

Send text e-mail

Report format: Abstract

Number of items: 每封通知寄送的書目筆數上限

Send at most: 50 items  Send even when there aren't any new results 勾選則即使沒有新書目時也要通知

Any text you want to be added at the top of your e-mail (optional):

其他附註

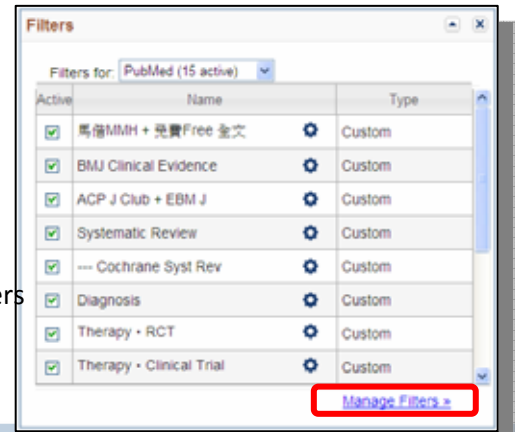

Save

## 10. 期刊目次訂閱: 定期 e-mail 最新期刊目次

請先[參考 2.5]使用限定欄位檢索出期刊名稱，接著繼續[參考 8~9]

# 11. Filters: 過濾特定類別資源，瀏覽更方便

1 於 My NCBI 主畫面之 Filters 區，點選 Manage Filters

You are managing filters for: PubMed Choose another database: PubMed (15 active) → 標的資料庫

6 建立客製化篩選條件(見下頁)

## Your PubMed filter list

2 目前設定 Filters (至多啟用 15 項)

Active	Name	Type

- 例 3: 特定喜愛期刊

Manage Filters

Link Icon: 表示凡在馬偕網域即有權連結電子全文 (即使在未透過馬偕專屬網址, 只要登入 MyNCBI 帳號即有作用)

## Part III. 附錄

### 12. 資訊檢索概念

#### 12.1 單字 vs “片語”(在控制詞彙使用片語將無法轉譯)

cardiovascular diseases vs “cardiovascular diseases”

#### 12.2 切截字: 將 \* 放字尾表字尾任意變化

(若在控制詞彙使用切截字檢索將無法轉譯)

therap\*: therapy, therapeutic, therapeutics...

#### 12.3 同義字

- { disease } 單複數
- { diseases }
- { pediatric } 美英拼法
- { paediatric }
- { CVD } 全名縮寫
- { Cardiovascular Diseases }
- { carotid ultrasonography } 同義異形字
- { carotid ultrasound }

#### 12.4 狹廣義字

- Metabolic Diseases
  - Glucose Metabolism Disorders
    - Diabetes Mellitus
      - Diabetes Mellitus, Type 1
      - Diabetes Mellitus, Type 2

#### 12.5 檢索欄位

篇名 · 關鍵字 · 摘要 · 控制詞彙 · 全文 · 或其他..

#### 12.6 布林邏輯: AND-OR-NOT

(1) A **AND** B: 檢索出同時含 A 與 B 關鍵字之紀錄

(2) A **OR** B: 檢索出含 A 或 B 任一關鍵字之紀錄

(3) A **NOT** B: 檢索出含 A 但不含 B 關鍵字之紀錄

(4) 組合運算規則

由左運算到右

營養 AND 地瓜 OR 蕃薯 (錯誤 ☹)

地瓜 OR 蕃薯 AND 營養 (正確 ☺)

加括弧先運算

營養 AND (地瓜 OR 蕃薯)

= 營養 AND 地瓜 OR 營養 AND 蕃薯

#### 12.7 自由詞彙 Free Text vs. 控制詞彙 Controlled Vocabulary

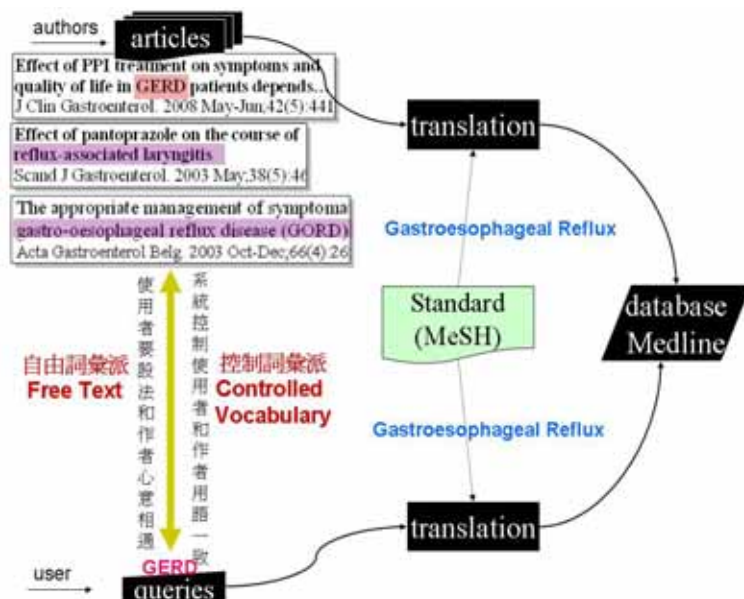

系統將關鍵字比對原始篇名、摘要等欄位。例: CEPS、中文期刊篇目索引、Google

優點:

- user 檢索過程較簡單
- 適用控制詞彙未提供的概念·包括新名詞(2003 始有 Severe Acute Respiratory Syndrome); 或某些形容用語·如 repeated fine-needle aspiration

缺點:

- 語義容易模糊
- 要儘可能列舉同義詞

系統將關鍵字比對控制詞彙表後轉譯。前提是每篇文章會先被資料庫製作者依內容給予數個控制詞彙。例: Medline: MeSH、CINAHL Headings

優點:

- 解決同義字問題
- 可彈性檢索廣/狹義詞
- 可幫助精確率與回收率

缺點:

- 要“習慣”才會用
- 新概念不適用

### 13. 全文取得

#### 13.1 線上直接取得: HTML / PDF

The screenshot shows the journal's interface. At the top, it says 'FullText: HTML'. Below, there are two columns of text. The left column contains metadata like 'Author(s): Demell, Beth D. PhD' and 'Volume 88(1), January 2009, pp 79-81'. The right column contains the article title and a 'Full Text (PDF) 104' link. Below the text, there is a 'CASE DESCRIPTION' section with a photograph of a man sitting on a floor, using a mirror to look at his phantom limb. A red circle highlights the 'Full Text (PDF) 104' link. Below the image, there is a 'FullText : PDF' section with another red circle highlighting the PDF icon in the browser toolbar.

#### 13.2 電子館藏目錄

The screenshot shows a library catalog search results page. At the top, there is a search bar with the text 'Herr K, Titler M. Acute pain assessment and pharmacological management practices. J Emerg Nurs. 2009;35(4):312-20.' Below the search bar, there are several search filters and options. A red circle highlights the search button. Below the search results, there is a list of items. The first item is 'Advanced Emergency Nursing Journal (form...)' and the second is 'Journal of Emergency Nursing [電子期刊]'. A red circle highlights the 'Journal of Emergency Nursing' entry. Below the list, there is a 'Full-text available' section with a red circle highlighting the 'Articles in Press' link. Below that, there is a 'Volume 35, Issue 4, Pages 277-398 (July 2009)' section with a red circle highlighting the 'Table of Contents' link. Below the table of contents, there is a list of articles. The first article is 'Acute Pain Assessment and Pharmacological Management Practices for the Older Fracture: Review of ED Trends' by Keela Herr, Marita Titler. A red circle highlights this article.
